- EZCart is an handy online shopping cart
- It has been developed using ReactJS, with Firebase as an Database
- Supports CRUD operations where user can Add, Update and Delete the Data

SimList | *NodeJS, MongoDB,SCSS* | (View Project)
- SimList is an NodeJS based Contacts Book
- The User can Add, delete and Update the Contact he/she requires
- Having NodeJS as Backend, and MongoDB as Database, SimList involves a Better UI with HTML/SCSS

Skills

* Javascript, C++, Python
* ReactJS, ReactNative, NodeJS, Django,MySQL, MongoDB, Firebase, Git, Github
* Data Structures, Algorithms, REST, Redux

Achievements

- Solved over 250 Problems across various coding platforms
- 2.5* Coder at Leetcode
- Represented College at IIT Kanpur (Won Smart-Hacks 2020)
- Won public speaking competitions(TEXNEX 19, ORCA 20) while in college
